

March 10th 2021

Dear Valued Customer,

Flint Group announces global price increase

Flint Group is experiencing significant cost increases for many of our key raw materials, packaging materials and freight. These costs have been increasing for some time, the pace of inflation of these costs is accelerating as many raw materials also report shortages.

We have absorbed these costs until now however with the continued increases in these input costs Flint Group Narrow Web has announced a price increase for all products of 8% effective for all deliveries on or after April 1st 2021 or when contracts permit. Certain products that result in portfolio complexity will receive an additional increase. Many of these products have a suggested alternate that comes with better long term price stability. These increases are necessary to ensure Flint Group is able to source the required raw materials in the market place.

We very much appreciate your business and your partnership with Flint Group. Our sales team will be in touch with you shortly to discuss the implementation of these price changes.

Sincerely,

Julian Cass
Vice President North America
Flint Group Narrow Web
